MyHealthWealth ? TA21 Medical Services

Slug: health | Category: other

Summary

MyHealthWealth.online is the released, live implementation of BusinesSite TA21 Medical Services. Join in three steps as a patient, then add role details. The specialists directory lists Dr Teboho Matebesi first (private anaesthetics, Midrand). His practice front door is drtebohomatebesiinc.online. Ask for an emergency or a checkup by text, a voice file, or a short video. Telemedicine is mic, message, and send. CareerWIL checks out back-office tasks at the live rate. The practice keeps the clinical note; you keep a portable copy. Fees, the practice number, scheme contracts, the conversion factor, and a live switching-house connection stay unset. Chat: guide health · open myhealthwealth.

Guide

TA21 Medical Services is released

MyHealthWealth.online is the live implementation.
The track has left the lab. Public pages stay in English. Your language is kept for voice and helpers.

Join

- Open Join in 2 minutes.

- Step 1 is the role. Patient is the default. The cards under ?More roles? are the same choice as the cards above.

- Step 2 is you. Step 3 is consent, then the account is created. An SMS code proves the phone.

- Role details come next, at /health/details, before the profile is treated as complete.

What you can do

- Specialists. /health/specialists lists Dr Teboho Matebesi Inc first. His name is not a menu item on MyHealthWealth.

- Practice front door. drtebohomatebesiinc.online is his own site: services, open times, and bookings. The brand on that site is the practice name.

- Emergency or checkup. A signed-in patient sends a typed note, a voice file, or a short video (6 MB). That logs the request. It does not book a clinical time, and it does not mean a clinician has accepted it. If no practice is chosen, the request is first available on the CareerWIL queue.

- Telemedicine. The thread is mic, message, and send. Tap the mic for speech-to-text. Hold it for a voice file. A separate control sends a short video.

- CareerWIL back office. Personnel whose role includes CareerWIL check out a task and complete it. The rate shown is the live task rate. eyesWallet is credited only when that profile is linked to a support provider. Otherwise the task is ready for payroll.

- Records. The practice keeps the clinical note it writes. You keep a portable copy and choose who may open it. A public-health official sees a record only when you share it.

Money, until the practice publishes its figures

- Service fees, the access fee, booking fees, and the annual preventive reward stay at zero.

- A zero-fee request or booking is logged and no money is taken.

- Cash is a receipt. An eyesWallet payment, once a fee is published and the practice has a settlement client,

debits the full amount and settles 97 percent to the practice. The card pay link uses the platform merchant.

- Naming a medical scheme records that cover was requested. It does not mark the account paid.

- A claim pack is an export. HealthBridge, MediKredit, and Mediswitch are the kind of switching service a pack can be handed to. None of them is connected yet.

- The practice number, the regulator number, scheme contracts, and the Rand conversion factor stay blank until Dr Teboho Matebesi publishes them.

What this guide does not claim

- No licensed tariff book is loaded. The anaesthetic worksheet uses the units the practice enters.

- FamilyXP is the home-care link. Calendars are not already syncing.

- A regulated herbal catalogue stays off the public pages until a certifying authority confirms it.
